Requirements for the use

- A valid CIT user account.
- A device with WPA2-Enterprise support. (WPA3 is also supported)
- Python3 installed

Procedure

- Connect to the site <https://cat.eduroam.org/?idp=5220> and download the installer.
- Execute the file with the command:

```
python3 eduroam-linux-FUoAS.py
```

- You will be prompted to enter your username and password (twice). Enter the username in the form: **username**@frankfurt-university.de. You will need to add the subdomain by hand if it isn't done automatically.
- As soon as your device is in range of the WLAN eduroam, a connection will be established automatically.
